Look at the title. What do you think the unit will be about?

How to help our planet.

электростанция

токсические выбросы

отходы производства

кислотный дождь

загрязненные облака

утрата естественной
среды обитания

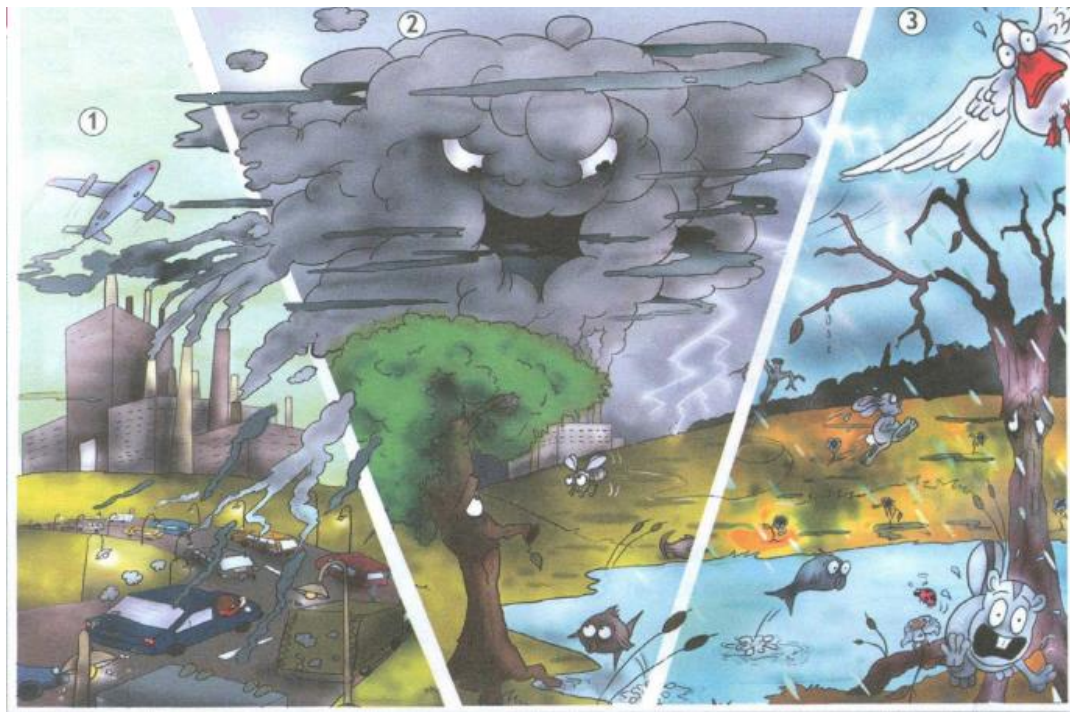

загрязнение воздуха,
воды и почвы

вымирание видов рыб и
растений

air, water and soil
pollution

Which of the following can you see in the pictures? Match.

A power
station/factory

Toxic fumes

Factory waste

Acid rain

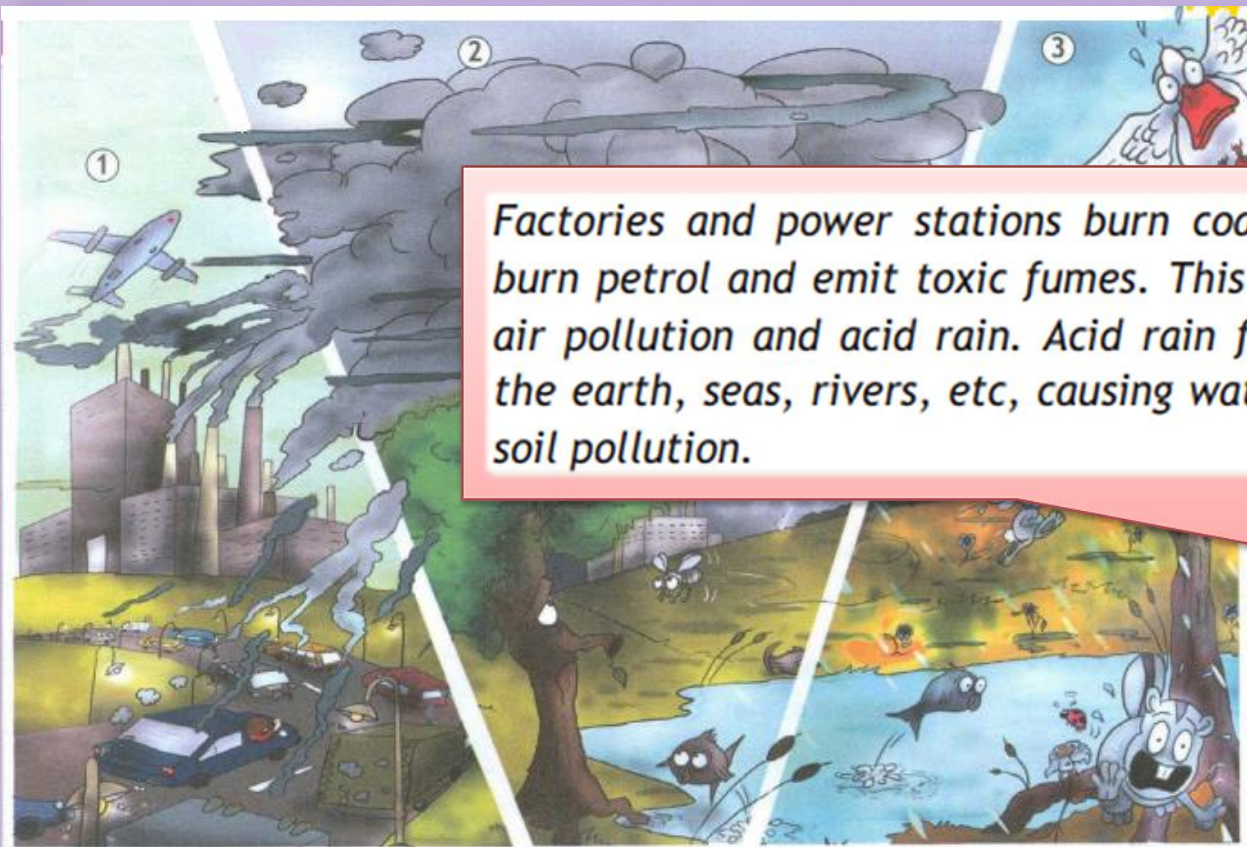

Polluted clouds

Loss of natural
habitats

Air, water and soil
pollution

Fish and plant species
dying

Look at the pictures again and the headings in the text. Can you explain the problem? Read and check.

Factories and power stations burn coal, cars burn petrol and emit toxic fumes. This causes air pollution and acid rain. Acid rain falls on the earth, seas, rivers, etc, causing water and soil pollution.

pollution and it harms,
then acid rain

anks with the best word A, B or C. Listen and

Rain

1 The problem

The problem starts here. Cars **burn** petrol, factories and power stations burn coal and **emit** toxic fumes. So, the air that we breathe becomes polluted.

2 Air pollution & acid rain

This pollution is **gathered** in clouds and with the **oxygen** and water in the **atmosphere** it becomes acid. The winds carry the polluted clouds across long distances, far 1) When it rains, this pollution **lands** on trees, houses, buildings, cars, clothes, everywhere!!! This is called acid rain, 2) there is actually 'acid fog', 'snow' and 'sleet' in the same way!

3 Water and soil pollution

When acid rain falls into lakes, streams, rivers and seas,

they become toxic. This is water pollution and it harms, kills or **wipes out** fish and plant species. When acid rain flows through the soil, it **poisons** trees and plants. Acid rain 3) causes serious damage to important buildings and objects.

4 Good news

The good news is that governments have been trying to **reduce** the air pollution that causes acid rain. 4) industries have been using new technologies for some time to help make factory smoke less **harmful** to the environment. But we need to do more! We can help reduce the amount of acid rain by using 5) cars less or by using solar power to heat our homes.
