2. Reading Read Charlotta's letter and mark the statements as T (true), F (false) or DS (doesn't say). Hi Lucie!

I am writing to you from the beautiful island of Majorca, in the Mediterranean. Jake and I have been here a week already and the days have just flown by! We are staying in a cute little hotel right next to the sea. A friend of Jake's recommended it to us and, I have to say, the view from our hotel window is just incredible!

So far, we have been spending our time exploring the island and lying on the beach during the day. We have also done a lot of sightseeing. We have visited the floodlit Cathedral and the Almudaina Palace. However, we haven't been to Belver Castle yet. In the evenings, we check out the local nightlife and, of course, the local cuisine! Last night, we drank 'Hierbas'. It's a Majorcan specialty and delicious. I will bring some back for you.

Did you know that Rafael Nadal comes from Majorca? I did not! Anyway, someone told us yesterday that he is playing in Palma this weekend. We are going to try to get tickets. I hope we manage to! See you soon! Love, Charlotte

IV. Read the following text and mark the statements T (true) or F (false).

We need energy to heat our homes, cook and clean for our families and for transport. It allows us to live a comfortable and easy life. However, if we do not use this energy properly we will soon run out. Luckily, there are things we can all do to help our planet and conserve our resources.

To begin with, much of the energy used at home goes to heating or cooling our homes. A simple way to help conserve energy is by lowering the thermostat by two degrees in the winter and raising it by two in the summer. By doing so, you will not only lower your heating bill, but you will also reduce the amount of carbon dioxide that enters the atmosphere.

Another way you can save energy at home is by buying energy-saving appliances. Appliances like washing machines and cookers use a great deal of gas or electricity to work. When shopping for new appliances, look for the energy-saving sticker; they might be a little more expensive to buy, but they help save energy, and in the end will help you save money on your bills.

A lot of energy is used by means of transport too. One of the many ways to achieve low energy usage is to leave the car at home and catch the bus or the train to move around the city. Fewer cars in the street means less traffic and it will not only help save energy, but it will also reduce the amount of air pollution.

In the end, it is up to every individual to take responsibility and change their daily habits. If everyone does their part, then we can help save energy and our planet's resources.

1. Everyone can participate in conserving energy and saving the planet.
2. Heating and air conditioning influence the amount of carbon dioxide released into the air.
3. Home appliances don't need much energy to run.
4. When travelling, the only way to save energy is to use public transport.
5. You do not need to change your daily routine to save energy.

The Attitude to Fast Food

It's OK to eat fast food occasionally but fast food is high in calories. So, if you often eat hamburgers and chips you can easily become obese (тучный, толстый). You must eat homemade food because it is healthier.

Everybody knows that fast food is cheap and quick. However fast food is not as tasty as homemade food. Young people prefer to eat pizzas, hamburgers and French fries but they should eat soup instead. Fast food companies spend lots of money to make people believe that fast food is cool. The average American eats three hamburgers with French fries a week. Is it surprising that many American teenagers are obese? Health care is devoted to create new eating habits so that we can have a healthier generation.

Obesity can lead to other diseases such as diabetes and heart strokes. This is why America now starting to fight back against the fast food companies. They are stopping serving fast food in school cafeterias. Restaurants serving traditional food are opening now.
